## **Fusion Professional (JAWS, ZoomText, and FSReader)**

Fusion Professional is an accessibility tool for individuals with vision impairment. It pairs JAWS, a screen reader, and ZoomText, a screen magnifier. JAWS and ZoomText can run by themselves or combined. Included with Fusion Professional is the FSReader, which is a DAISY Player software.

## **Central Access Reader (CAR)**

CAR is a text-to-speech application designed specifically for students with print-related disabilities. CAR reads Word Documents and pasted text using the voice installed on your computer. CAR has an intuitive interface and many customizable features.

## **NonVisual Desktop Access (NVDA)**

NVDA is a screen reader for individuals with vision impairment. It reads text on the screen. NVDA can also convert text into braille for users of a braille display device.

## **Natural Reader**

Natural Reader is a text-to-speech software that can read any text such as Microsoft Word files, webpages, PDF files, and E-mails.

## **Dragon Naturally Speaking**

Dragon Naturally Speaking is a speech recognition program that allows you to dictate your words and have that speech transcribed as written text. Dragon allows you to control the computer with your voice; dictate or modify documents, spreadsheets, and presentations; send email and search the web.
