

Student Success Outcomes – 2010

*The third of three reports to the Big Bend Community College Board of Trustees
on progress toward goals of the 2009–2014 Academic Master Plan*

Presented to the BBCC Board of Trustees, September 7, 2010
Prepared by the Office of Institutional Research & Planning
Valerie Kirkwood, Dean of Institutional Research & Planning
Starr Bernhardt, Research Analyst

Mission Statement

The mission of Big Bend Community College is to serve the educational needs of a diverse population throughout its service district. As a comprehensive two-year community college, the institution works with its partners to provide a variety of educational opportunities, including:

- courses and training for university and college transfer,*
- occupational and technical programs,*
- basic skills and developmental education,*
- community and continuing education,*
- pre-employment and customized training for local business and industry, and*
- support services for students to help promote student access, success, and retention.*

BBCC Board of Trustees' Ends Statements

The BBCC Board of Trustees provides policy direction through the following Ends Statements derived from the college Mission. The Ends Statements are implemented through the BBCC Academic Master Plan.

E-1 Mission

The mission of BBCC is to serve the educational needs of a diverse population throughout its service district.

E-2 Access

BBCC provides quality resources and affordable access to the diverse population of its entire district.

E-3 Partnerships

BBCC works with organizations and agencies to enhance access and services for our district population.

E-4 Student Achievement

BBCC students and clients develop and achieve their goals supported by the staff and resources of the college and its partners.

E-5 Climate

BBCC provides and maintains a climate of purpose, respect, and safety for students, staff, and partners.

E-6 Cultural Enrichment

BBCC will encourage the development of culturally rich programs for the college and community, and offer lifelong learning opportunities for the residents of community college district #18.

Outcomes 2010

Table of Contents

Executive Summary.....	1
Summary Report Card 2010	
Outcome A.1.....	7
Outcome A.2.....	9
Outcome A.3.....	10
Outcome B.1.....	11
Outcome B.2.....	13
Outcome B.3.....	15
Appendix A: 2009 BBCC Board of Trustees Report Card (Outcomes 2009).....	A1
Appendix B: 2009 BBCC Staff Report Card (Outcomes 2009).....	A7
Appendix C: New Student Orientation and Reenrollment.....	A13
Appendix D: Distance Education / Online Tutoring.....	A15
Appendix E: Library Use Data.....	A17
Appendix F: Credit-bearing Enrollment (Unduplicated) / State and Total FTEs / Percent of Target FTE met.....	A19
Appendix G: Overall Success Rate / Success Rates by Division / Pre-college Math Success Rates / Pre-college English Success Rates.....	A21
Appendix H: Student Success Rates in all Courses (2007-08, 2008-09, 2009-10).....	A23
Appendix I: Placement Trends / Placement Trends by Service District High School.....	A65
Appendix J: Students with Educational Plans.....	A69
Appendix K: Student Characteristics by Intent.....	A71
Appendix L: Student Characteristics by Program.....	A77
Appendix M: Year-to-Year Retention.....	A93
Appendix N: Quarter-to-Quarter Retention.....	A99
Appendix O: Basic Skills Achievements.....	A105
Appendix P: Completions: Degrees, Certificates, and Short-term Training / Completions broken down by Demographics.....	A107
Appendix Q: IPEDS Comparison of Graduation Rates.....	A113
Appendix R: Estimated Employment & Pre-/Post-training Earnings Data.....	A115
Appendix S: 2009 Marketing Efforts.....	A121
Appendix T: BBCC Students by Zip Code and High School.....	A131
Appendix U: 2009 CCSSE Results Summary.....	A135
Appendix V: Partnerships Matrix.....	A155
Appendix W: Financial Aid Data.....	A165
Appendix X: Tech Prep Data.....	A167
Appendix Y: 2009 Administration Activity Log.....	A169
Appendix Z: Counselor and Advisor Outreach Efforts 2008-09.....	A179

Student Success

Outcomes 2010 is a comprehensive data-focused report that monitors BBCC's efforts to meet the goals of the Academic Master Plan (AMP). Last year's report (Outcomes 2009) was the first report of this type and reflected efforts to meet the AMP outcomes during the first year of the new 2009-14 AMP. An extensive and interactive analysis of this data by BBCC faculty, staff, and the Board of Trustees resulted in an assessment of progress toward meeting the AMP objectives as well as providing direction in setting new goals for the following year. This year's report (Outcomes 2010) provides information necessary to assess if the goals and action

items resulting from last year's analysis were started and/or met, as well as describes new goals for the 2010-11 academic year.

The BBCC Board of Trustees' annual retreat is the capstone of the college's use of data to validate the outcomes of the AMP. Weeks prior, BBCC faculty and staff (Cabinet and AMP Committee) received the same data sets provided here and reviewed them in light of the AMP outcomes. Through round table discussions with these groups, we captured faculty and staff interpretation of the data and their recommendations for moving forward to better satisfy college goals. A summary of

Trustee Pixton provides feedback on the college's efforts toward meeting goals of the 2009-14 AMP at the Board of Trustees' annual retreat.

these discussions was provided to the Board of Trustees, in addition to all of the data, prior to the retreat. Trustees individually analyzed the information provided and openly discussed their opinions on how well we met our goals at the retreat, effectively bringing together faculty, staff, and Trustee assessment of progress toward AMP goals. The final results of this exercise can be found in the Summary Report Card 2010 (pages 7-16) and are the foundation of this report.

The above described exercise was organized around the basic structure of the AMP, which focuses on two main areas of student success in relation to the six BBCC Board of Trustees' Ends Statements: ACCESS and PROGRAMS. Each of these two areas has three major outcomes under it with multiple action plans and sub-outcomes related to each. The comprehensive yearly data analysis described here serves to determine if the college satisfied the three major outcomes under each overall area (Access and Programs).

Access

The three major outcomes under Access focus on the increased use of college resources (A.1), increased numbers of students enrolled for educational planning and instructional activities (A.2), and increased student/client revenues (A.3). The BBCC Board of Trustees and staff felt that we satisfied each of these outcomes, reflected in increased ratings over last year. Although each of these goals was met, additional information was requested for next year's report to more thoroughly analyze the Access outcomes.

To better understand the increased use of college resources, more specific information on who is using resources will be captured and reported. Faculty and staff also felt that their efforts in outreach, partnerships, and advising were not being adequately captured and reported, resulting in the underreporting of these efforts. Starting fall quarter 2010, we will collect this information on a monthly basis and provide it in next year's Outcomes (2011) report. The BBCC Trustees and staff also felt that communication with students, parents, and high school staff needs to increase. To help this, a bigger push to enter student contact information into the Azorus system will be made this year. Additionally, revenue information will be included in next year's Outcomes report.

Programs

The three major outcomes under Programs are directly related to student success: students complete courses with a "pass" or 2.0 grade point or better (B.1), students establish educational plans (B.2), and students continue to complete goals according to their educational plan (B.3). Although ratings improved over last year, these three outcomes were rated consistently lower than the Access outcomes.

Additional data on success rates of students in high touch programs was requested. It was also suggested to incorporate College Success

Skills classes in the professional technical program areas. BCC continues to struggle with low success rates in pre-college level math courses. In response to this, BCC math faculty redesigned two of these courses to a modularized method of delivery. The newly modularized pre-college level math courses will be piloted in 2010-11.

The lowest rated outcome was students establishing educational plans (B.2). This outcome received a lower rating because, although professional technical students have clearly defined and reportable educational plans, academic/transfer students do not. Therefore, we cannot say with confidence how many students actually have and are following educational plans. Educational plans are ultimately related to intrusive advising and are critical to student success because they provide the structure and guidance students need to reach their academic goals. To better understand students' use of advising, we will

collect advising logs from faculty on a monthly basis (starting fall 2010). BCC Board of Trustees and staff also suggested continuing to engage students in the advising process, training all advisors on use of Degree Audit, and providing training to high school staff on starting the educational planning process in high school. Degree Audit will be widely publicized to students and advisors this fall (2010).

Although retention rates have improved and the number of completions increased in 2009-10, there is concern about the lower retention rates for males—especially Hispanic males—and the decrease in the number of Associate in Arts and Science (Direct Transfer Agreement) degrees awarded. Improved communication with and activities to engage males and Hispanics will be undertaken to improve retention rates in these groups. Additionally, research will be conducted to understand the drop in transfer degrees.

Trustees Kenison and Blakely participate in a group discussion about their interpretation of the data from the Outcomes report to determine if we are meeting our AMP goals.

Dean Kirkwood mediates discussions of Outcomes data with the BCC Board of Trustees at their annual retreat.

Student Success

The overall focus of the AMP is STUDENT SUCCESS, measured by retention, success in courses, and persisting to earn a certificate and/or degree. Once students are enrolled at the college, it is critical to keep them here (retention), to persist and succeed in classes, and ultimately complete their educational goals (transfer to a four-year school, earn a certificate or degree, etc.). In 2009-10, BCC maintained or improved in each of these areas, although there are areas of concern and room for improvement under each.

Overall:

- Year-to-year retention increased 6%
- Fall-to-spring retention is highest it has been in past three years (91%)
- Course success rates are consistent over past five years (77%-80%)
- Overall number of completions increased 17%

Retention

Year-to-year retention of both females and males increased from 2007-08 (reenrolled in 2008-09) to 2008-09 (reenrolled in 2009-10). Although year-to-year retention of males has increased nearly 10% from last year,

male retention is still significantly lower than female retention overall. Hispanic year-to-year retention aligns with the overall retention rate for the past three years. However, major differences arise in the Hispanic student population when it is broken down by sex. Hispanic female year-to-year retention increased 10% from 2007-08 (reenrolled in 2008-09) to 2008-09 (reenrolled in 2009-10), but Hispanic male year-to-year retention decreased 10% in that same time period—more than doubling the difference between these two groups. Interestingly, year-to-year retention of Hispanic females is approximately 10% higher than that of white females, but the trend is reversed and nearly doubled for males. White males retain year-to-year at a much higher rate than Hispanic males. (Appendix M) One goal for the Outcomes 2011 report will be to disaggregate this data further, to understand if certain groups of students are reaching their academic goals and, therefore, not reenrolling or if they are actually dropping out of college.

The 2009-10 academic year had the highest rate of fall-to-spring (“quarter-to-quarter”) retention seen over the past three years at BCC. Fall-to-spring retention of new (fall quarter) students was 91% in 2009-10—nearly a 10% increase over the 2008-09 fall-to-spring retention rate. Although the overall fall-to-spring retention rate has increased, retention

trends for Hispanic students decreased slightly over this time. With the increase in white student fall-to-spring retention, there is now a 10% gap between these two ethnic groups in fall-to-spring retention. Accounting for this trend is the fact that fall-to-spring retention of Hispanic females dropped 8% from 2008-09 to 2009-10. Although fall-to-spring retention of Hispanic males increased slightly during this time, both groups still retain approximately 10% lower than their white counterparts. (Appendix N)

Course Success Rates

Research shows that if students are able to obtain a 2.0 grade point or better, they are more likely to be successful in the next progressive class level. Therefore, success at BBCC is defined as earning a “pass” grade or 2.0 grade point or higher. Overall success in courses or workshops at BBCC has been stable over the past five years. In 2009-10, the overall success rate at BBCC was 77%. This rate has only decreased 3% since 2007-08. When broken down by division, all divisions boast a 70% or higher success rate in classes, excluding pre-college level math courses. (For purposes of closer analysis, pre-college level math classes were grouped and analyzed together, outside of the Math/Science Division.) Pre-college level math had a 49% success rate last year, consistent with trends over the past five years. This is over 20% lower than the next lowest division success rate (Math/Science, 71%). (Appendices G and H) The newly modularized pre-college math courses discussed earlier will be offered this year (2010-11). Year-end success rates in these classes will be revisited to determine if this approach positively impacted course success rates.

Completions

Completions describe the ultimate goals that BBCC students reach at the end of their time at the college. It includes Associate Degrees, Certificates of Achievement (≥ 45 credits with related instruction in Computation,

Communication, and Human Relations on the Job), Certificates of Accomplishment (< 45 credits without Human Relations on the Job), and Short-term training (prepares students to get an entry-level job in a new area).

The overall number of BBCC degrees, certificates, and completions awarded in 2009-10 was 556, an increase of 17% over 2008-09. The number of professional technical Associate in Applied Science degrees increased 28% from 2008-09 to 2009-10; however, the number of Associate in Arts and Science Direct Transfer Agreement (DTA) degrees awarded in 2009-10 decreased 10% from the previous year. This is an alarming trend that has been occurring over the past four years and warrants further investigation. The gap between percent of females versus males earning associate degrees narrowed in 2009-10 due to the fact that fewer females and more males were awarded these degrees than in 2008-09. Overall, Hispanic students earning associate degrees has decreased slightly since last year. Of the degrees awarded to Hispanic students, over 10% fewer were awarded to Hispanic females than last year. The number of BBCC certificates awarded increased by 53% in 2009-10 over 2008-09, however the number of short-term training completions decreased significantly during this same time. (Appendix P)

In conclusion, it appears that our inability to grasp the implication of completing an educational plan may be the key to improving students' persistence toward earning degrees and certificates. We will focus on whether or not intrusive advising meets our hypothesis that educational plans are the best indicator of student motivation and success. Perhaps the direct measurement of advising time and impact will provide a clearer picture of college actions leading to student success.

	What's done	Efforts for 2010-11
A.1 An increase in the use of college resources		
A.1.	The Board and staff rated the BBCC's progress on this outcome higher in 2009-10 year than in 2008-09 they believe more specific information should be captured to understand which resources are being accessed.	<ul style="list-style-type: none"> • Expand data collection. <ul style="list-style-type: none"> • Which students are using labs? • Which students attend ASB events? • Which students are using high-touch programs (SSS, OG, Student Persistence, etc.) and their subsequent success • Capture information on faculty's off-campus visits • Collect monthly log of all advising efforts by faculty/staff • Send students messages that encourage educational/career planning through email, the website, Viking seminars, etc. • Improve marketing and education on financial aid resources • Utilize BBCC counselors to provide resource awareness • Create student-to-student mentoring and support system consider asking ASB officers or students in a Leadership course
A.2 An increase in the total number of students/clients enrolled throughout the college district for educational planning and/or instructional activities.		
A.2.	Board and staff both believe BBCC has improved in this area and should continue current efforts to reach out to district schools. All contacts with potential students should be captured in the Azorus system to provide more communication with potential students.	<ul style="list-style-type: none"> • Target marketing efforts to specific groups i.e. <ul style="list-style-type: none"> • Freshmen students, right out of high school • Students and their parents providing information that meets their unique individualized needs • Host workshops for high school counselors to help them incorporate educational planning in students' high school work
A.3 An increase in student/client revenues		
A.3.	Enrollment continued to climb in 2009-10, up to 2120 total FTEs even with the continued decline in state revenues.	<ul style="list-style-type: none"> • Develop partnerships with the foundation and business to support educational programs that can't be funded by the state. • Monitor Azorus data and follow up on all contacts. • Comprehensive revenue information will be provided
Outcome B.1. Students complete courses or workshops with a grade of passing or 2.0 grade point or better		
B.1.	Overall course success rates have remained stable in the last five years ranging from 77% to 80%	<ul style="list-style-type: none"> • Publish success rates of students based on their educational preparation • Add data that shows the success of students in high-touch programs are more successful • Improve pre-college math success rates – through modularization • Work with high school teachers to improve placement scores • Investigate why students are not accessing services • Incorporate study skills into Prof-Tech programs
Outcome B.2 Students establish educational plans		
B.2.	BBCC has implemented efforts that require students to get advising and mechanisms to assist advisors with the advising process. The degree audit is now available to students and advisors and will be publicized this fall (2010).	<ul style="list-style-type: none"> • The college will continue conversations on how to engage students in the advising process • Advisors will be trained on degree audit • Provide training to high school counselors and teachers (at their in-services?) on educating students on educational planning, college services, programs, etc. • Utilize current training on intrusive advising
Outcome B.3. Students continue to complete goals according to their educational plan		
B.3.	Retention rates have improved in 2009-10, but male students lag behind female students	<ul style="list-style-type: none"> • Continue to work with students to develop educational plans that will improve credential attainment • Increase activities for and communication with males and Hispanics to improve retention rates • Determine why Arts & Sciences degree attainment is decreasing. • Measure the impact of high-touch programs degree attainment.

Outcome A.1. An increase in the use of college resources

Average Rating: 16.9
18.0

Data Cited: Appendices A, B, C, D, E, F, J, L, M, P, Q, S, U, V, W, Y, Z

Additional Data Needed

- English, math and OIT labs usage
- 2009-10 enrollment by zip code and H.S. data
- ATEC use by non-students
- Seminars in Prof-Tech programs
- Job placement office data
- Azorus data
- Disability Services data
- Overall % of students attending New Student Orientation (NSO)
- Monthly log of advising efforts by all faculty/staff
- Effectiveness of high-touch programs (SSS, OG, Student Persistence, etc.) Which programs do students use? Which students use them? Success & retention rates?
- Assessment of resources offered in the service district (advising, # of students in online courses for individual communities, computer lab usage in Lind, etc.)
- Distance Ed: unduplicated number of sections, success rates, why are students moving to online classes?
- Public's knowledge of financial aid availability & opportunities/resources
- Comparison of BBCC costs with other institutions
- 2010 Spring Enrollment Survey results
- ASB event attendance
- Off-campus visits by faculty
- Continuing Ed courses (enrollment)
- Annual log of faculty partnerships
- Placement testing in H.S.
- Achievement levels of students utilizing SSS

Goals for 2010-11

- Improve data collection and reporting methods:
 - Better document outreach efforts by faculty/staff.
 - Lab usage (Office Information Technology, math, English labs).
- Increase placement testing in area high schools.
- Increase use of resources by students, community, and staff.
- Increase attendance at New Student Orientation.
- Increase Educational Planning efforts.
- Create a student ambassador group (BOT goal from 2009-10).
 - ASB, Leadership Class, etc.
- Continue current efforts.

Plans to help achieve goals

- Create a spreadsheet (similar to Appendix Z: Counselor and Advisor Outreach Efforts) on the portal and email link to all faculty/staff, requesting they fill it out with their outreach efforts (monthly).
- Increase New Student Orientation promotion.

- Widely publicize Degree Audit to students.
- Increase career and educational pathway exploration with students (especially low income, first generation students).
- Send messages to students to encourage educational/career planning (email, website, Viking seminars, etc.)
- Improve marketing and education on financial aid resources available to students.
- Market the cost comparison of attending 2 years at BCC vs. cost of earning the same credits at a 4 year institution and the amortized costs of loans over the lifetime of a loan.
- Utilize BCC counselors more.

Outcome A.2. An increase in the total number of students/clients enrolled throughout the college district for educational planning and/or instructional activities

Data Cited: Appendices A, B, C, D, E, F, H, I, J, K, L, M, N, P, S, T, W, Z

Additional Data Needed

- Azorus data
- *Why* are students attending BBCC?
- Why do students participate in NSO, take the placement test, and fill out an application, then not attend BBCC?
- Continuing Education enrollment data
- Faculty/staff outreach efforts, similar to administrator and counselor/advisor logs (Appendices Y, Z)
- 2009-10 Enrollment by zip code and H.S. data
- Degree Audit for online students (advising, ed plans)

Goals for 2010-11

- Continue current efforts and revisit 2009-10 goals/plans.
- Continue and increase marketing efforts to service district outside of Moses Lake.
- Maintain enrollment as is or enroll more students, mindful of available class space.
- Attract more “college freshmen” age students, right out of high school.
- Counselor and Advisor use of Azorus when visiting off campus.
- Continue current efforts.
- Better coordination/training with high school counselors and teachers.
- Better direct education/marketing to potential students and parents.

Plans to help achieve goals

- Engage the new Recruitment Committee in the above activities.
- Host workshops for high school counselors on better educational planning/career pathway advising.
- Maintain efforts to provide counseling and tutoring services.
- Provide service district high schools with data to help them incorporate ed planning in high school work (e.g. Senior Projects).
- Continue and increase personal contacts.

Outcome A.3. An increase in student/client revenues and state-funded FTEs

Some AMP Committee members felt that they could not adequately rate this outcome without actual revenue data.

Data Cited: Appendices C, D, F, H, M, N, O, P, R, S, T, V, W

Additional Data Needed

- Training/seminars held on campus by outside businesses
- CBIS, ARFF, etc. classes/trainings
- Break out full-time vs. part-time, on ground vs. online, and daytime vs. evening students to better focus marketing efforts.
- State Tuition dollars & Grant and Contract funding
- Revenue collected

Goals for 2010-11

- Generate corporate revenue to support educational programs by increasing the number of partnerships.
- Revisit and continue with 2009-10 goals/plans.
- Monitor Azorus data and follow-up on all contacts.
- Continue current efforts.

Plans to help achieve goals

- Engage the BBCC Foundation to seek additional corporate revenue.
- Target program areas that cannot be funded by state dollars: MIST, Computer Science, Continuing Ed, etc.
- Inform Prof-Tech advisory committees of program needs.
- Research what local businesses need from us and form partnerships on training, teaching positions, etc.
- Generate annual revenue report.
- Continue to engage high school counselors.

Outcome B.1. Students complete courses or workshops with a grade of passing or 2.0 grade point or better

Average Rating: 14.8
15.0

Data Cited: Appendices G, H, I, L, M, N, O, P, U

Additional Data Needed

- Pass/fail rates of students not placing in college level English in other classes (Social Science classes, Science, etc.)
- Side-by-side comparison of three-year success rates vs. years separated onto separate sheets.
- Success rates of high-touch program students vs. non high-touch program students
- Online data—*why* are students taking online courses and are they doing as well?
- Comparison of online vs. on ground success rates
- Online students' location
- Online students' employment status
- (See also A.1)
- SSS data (tutoring, etc.)
- Information on which programs use 2.0 grade point or better as a "p" (pass) grade. Is the "p" grade equal across campus and is it a good representation of success?
- Break out 0.7-1.9 grade points as a separate category in success rate data (Appendices G, H).
- Are successful students using services? Which services?
- Correlation between modalities and success rates? Are different types of courses (e.g. online vs. on ground) seeing different success rates? Also, student use of different modalities—e.g. how much are students actually using lecture capture?
- Success rates at similar colleges or national standards for comparison...is this available?
- Feedback from students on why they are not using services (i.e. tutoring, counseling, etc.).
- What are students' perceived barriers?

Goals for 2010-11

- Standardize pass/fail grade values.
- Implement I-BEST methodology in classes with low success rates.
- Improve pre-college level math success rates.
- Maintain or improve current overall success rates at 75%-80%.
- Investigate importance of related instruction to employer satisfaction.
- Investigate expanding Math Jam/math refresher type course to more people.
- Continue current efforts.

Plans to help achieve goals

- Work with high schools to improve placement scores.
- Define "pass" grade as an institution.
- Incorporate study skills classes (like CSS) into Prof-Tech programs.
- Math department work (modularization of material, etc.) currently underway.

- Revisit and continue work on 2009-10 goals/plans: block scheduling and increase I-BEST offerings.
- Design and implement an academic/financial aid probation mentoring program.
- Continue and increase high-touch efforts.
- Work closely with high school math teachers to improve college math preparation.
- Increase use of tutoring and counseling.
- Increase participation in College Survival Skills classes.

Outcome B.2 Students establish educational plans

NOTE: four (4) people on the AMP Committee felt that the data presented in the workbook for this outcome was not sufficient to adequately evaluate and rate the true intent of the outcome, which is to increase students' use of advising—ultimately leading to student success.

Data Cited: Appendices C, E, J, K, M, P, Q, U

Additional Data Needed

- Degree Audit data
- Determine success rate of students with educational plans vs. those without plans
- Campus-wise advising “log” to find out which students go to advising...are they more successful? Who goes back? Etc.
- Better monitor who actually has educational plans.
- Feedback from high school counselors, teachers, parents, and students as to why this is not done more/better in high school.
- What are the barriers to establishing educational plans? Lack of awareness? Resources?

Goals for 2010-11

- Better data collection on and tracking of advising across campus.
- Continue conversations on how to engage students with advisors (i.e. block enrollment of students with <30 credits, etc.).
- Focus efforts on students without educational plans.
- Investigate including educational planning in CSS classes.
- Explore the concept of “intrusive advising”.
- Continue and increase current efforts.
- Increase efforts in high schools.

Plans to help achieve goals

- Educate Advisors on use of Degree Audit
- Conduct campus-wide study on advising efforts/use

- Utilize currently available audio training on intrusive advising (Title V)
- Recruit faculty to spend time advising in the new Transfer Center—to make them more visible to students
- Provide training to high school counselors and teachers (at their in-services?) on educating students on educational planning, college services, programs, etc.
- Help service district high schools include educational planning in students' senior projects.
- Increase contact with BBCC counselors.
- Provide a College Survival Skills class in the high schools—involve BBCC faculty/staff (“College in the High School”); include educational planning and financial planning as well.

Outcome B.3. Students continue to complete goals according to their educational plan

Data Cited: Appendices C, D, G, H, I, J, L, M, N, O, P, Q, R

Additional Data Needed

- Transfer rates (including to other community colleges and/or without a BBCC credential)
- Effectiveness of high-touch programs (Student Support Services, Opportunity Grant, Student Persistence, etc.) Which programs are effective? Which students use them? Success & retention rates?
- Number of students who are here for “spot learning” vs. earning a credential
- Retention in relation to Employment Status
- Retention in relation to Financial Aid probation/suspension
- Why are Arts & Sciences degrees decreasing? (Note: AMP committee was also concerned about the advising or lack thereof that this group receives.)
- Intervention Scholarship data (including the “category” or reason for applying).

Goals for 2010-11

- Improve DTA (Arts & Sciences) degree completion rates.
- Continue discussions on how/when to award certificates in Prof-Tech programs.
- Tie-in industry with classes/programs (i.e. internships, etc.)
- Increase retention of MALES and HISPANICS.
- Continue current efforts.

Plans to help achieve goals

- Determine why Arts & Sciences degree attainment is decreasing.
- Encourage faculty to increase service learning offerings in courses.
- Increase activities for and communication with MALES and HISPANICS to increase retention of these groups.
- Engage industry and employers to show correlation between degree completion and earnings.

- Increase training with high school counselors, teachers, parents.
- Maximize and use available data.
- Look at local industry to identify needs for Prof-Tech programs.
- Encourage school districts to incorporate educational planning as students begin to develop their school projects early in high school.

Appendix A

2009 BBCC Board of Trustees Report Card
(Outcomes 2009)

A.1 An increase in the use of college resources

Board Rating: 12.2

Data Cited

- Online tutoring use (p. 27-28); average number of online tutor is approximately 60
- Library use (Appendix A, p. 72)
- Retention rates (Appendices H, I, J, K; p. 142-161)

Additional Data Needed

- Use of college resources by community groups
- Why students are not accessing available resources
- Data on online students, showing continuation into other online classes
- Determine which online classes will have the largest enrollment

Goals for 2009-10

- Improved Marketing Plan and continuing advertising
- More contact at high school and pre-college level
- Determine how to engage students from the “online culture” with college resources

Plans to help Achieve Goals

- Increase individual student contacts
- Provide student support through a student group—not advisors, faculty or staff--student ambassador program
- Provide more financial aid information to students and parents at the pre-college level (high school, middle school); include information on financial probation/suspension
- Motivate high school teachers to encourage/help high school students develop a plan
- Provide face-to-face appointments with students to verbally explain the financial probation/suspension process vs. the mailed letter

A.2 An increase in the total number of students/clients enrolled throughout the college district in educational planning and/or instructional activities (engagement)

Board Rating: 17.8

Data Cited

- Increase in enrollment (p. 30)
- Enrollment in distant education and online classes (p. 30)

Additional Data Needed

- Information about what motivated students to attend BBCC and why some did not receive information about college offerings and resources
- Why are students not reenrolling? Are they dropping out or completing their educational goals?

Goals for 2009-10

- Increase enrollment by 2%.

Plans to help Achieve Goals

- Increase communication with district schools: board members, faculty and staff
- Increase direct marketing/advertising to families/households in the service district
- Increase contact with high school teachers and students
- Create a BBCC presence in the high schools—bring back running start students and graduates/transfer students to talk to high school and middle school students
- Create a face-to-face relationship between BBCC and high school faculty because high school students are going to their teachers for “advising” and that alliance would help provide students with accurate information about BBCC

A.3 An increase in student/client revenues and state-funded FTEs

Board Rating: 17.3

Data Cited

- Enrollment (p. 30)
- Decreased state and federal funding
- Increase in FTE and meeting FTE target (p. 32)

Additional Data Needed

- How much of the FTE increase was due to current economic factors vs. our efforts/plans

Goals for 2009-10

- Continued growth
- Increase revenue stream from state and federal funding to decrease load on students and private donors
- Outreach to community and employers

Plans to help Achieve Goals

- Lobby and sell ourselves better
- Use federal stimulus sources
- Marketing Plan
- Involve faculty with outreach

B.1 Students completed courses or workshops with a grade of passing or 2.0 GPA or better

Board Rating: 14.5

Data Cited

- Course success rates (p. 34-35)
- Success in developmental English and math (p. 35)
- Appendices D, E, F, & G (p. 94-141)

Additional Data Needed

- Research placement test scores and grades at other community colleges to compare to our data (to help set standard performance benchmarks)
- How we impact college-prep/teaching at the high school level
- Research, by school district, students' college readiness

Goals for 2009-10

- Improve tutoring services for math and English
- Work with school districts to help them and their students do better in preparing for college-level work

Plans to help Achieve Goals

- Build relationships with school districts to help affect the high school math programs for success prior to entry to BBCC
- Increase involvement from the school district meetings, to include involvement from high school faculty and staff

B.2 Students establish educational plans

Board Rating: 7.4

Data Cited

- Conversations with students and graduates—failure to establish educational plans and or access available resources to help
- Lack of student participation in educational planning (p. 37)
- Low number of students who developed education plans (p. 37)

Additional Data Needed

- Reasons why students failed to access available resources for help in establishing an educational plan
- Collect input from student who are not creating educational plans
- Do all advisors know the programs well? Are they advising with adequate knowledge?

Goals for 2009-10

- Establish programs to make students more aware of the need for an education plan and what resources are available for help in doing so
- Establish “self-help” resources for students who are not comfortable working with traditional resources
- Communicate to student and parents, the need and benefit of having an educational plan

Plans to help Achieve Goals

- Have every instructor touch on or ask about education plans with their students—maybe offer extra credit for those who complete a plan
- Develop some high-touch programs to monitor students
- Offer a class before school starts to teach students how to develop an educational plan and the significance of the plan
- Work with high school advisors to help students become self-aware of their learning styles, interests, and backgrounds that would influence a passion for learning—whether it is learning a technical skill or a more academic focus
- Work with area high schools to incorporate educational plans into their senior projects

B.3 Students continue to complete goals according to their educational plan

Possible revision:

B.3 Students persist to attain completions, certificates or degrees or workshops and are retained quarter to quarter and year to year to achieve their goals.

Board Rating: 8.4

Data Cited

- Completions (p. 41; Appendix L, p. 162)
- ABE Skills achievement (p. 40)

Additional Data Needed

- Determine if older students initially enrolled for degree attainment or “spot education”

Goals for 2009-10

- Continue to work with all students to help them develop an educational plan
- Create more interactive-learning experiences vs. straight “seat time” classes
- Investigate on-the-job training possibilities; work for credit; hands-on learning

Plans to help Achieve Goals

- Coordinate with high school faculty
- Learn what it takes for students to find their “passion”; learning doesn’t always come from books and books don’t always guarantee learning

Appendix B

2009 BBCC Staff Report Card (Outcomes 2009)

A.1 An increase in the use of college resources

Staff Rating: 16.6

Common Themes

Students' use of online tutoring has been positive. The college needs to continue to promote awareness of the service.

Library use increased in 2008-09; however, there is a need to understand the impact of online resources. The information did not provide an understanding if individuals were BBCC students or community members who came to the library to complete school assignments, study, or for personal reasons.

Overall, more information is needed on math and English lab usage, financial aid usage, activity attendance and other activities that engage students.

Data Provided

- Enrollment
- Online tutoring use
- Library use (Appendix A)
- New Student Orientation attendance

Additional Data Needed

- ASB event attendance
- English and math lab usage
- Additional library use information
- Percent of new students who attend New Student Orientation

Goals for 2009-10

- Track Students who use English and math labs to determine if it impacts students' success in classes.
- Gather comprehensive student use of services.

Plans to help Achieve Goals

- Establish a method to track students' English and math lab usage.
- Educate students and staff on Financial Aid processes with special attention on probation and suspension. Fifteen minutes will be devoted to this at the fall in-service. Additional forms of educating part-time instructors who don't attend in-service will be incorporated, such as a Financial Aid Facts sheet provided quarterly.

A.2 An increase in the total number of students/clients enrolled throughout the college district in educational planning and/or instructional activities (engagement)

Staff Rating 18.1

Common Themes

It was great to meet the State FTE target this year. In spite of this, staff must continue to work to maintain and increase FTEs. We are concerned that many potential students still cannot access classes due to a lack of financial resources, proximity to the campus, or lack of access to high-speed internet.

Although the goal was met, there was a decline in enrollment of students under 20-years-old while enrollment of students over 24-years-old increased. This surge in older students suggested the need for flexible class schedules and services, such as math tutoring, and computer science literacy courses geared to this population. We also have a concern for the enrollment and retention of white male students. While employment opportunities or a lack thereof may have quarter to quarter impact, the data still shows this group as being the least successful of the groups.

Enrollment in Distance Ed courses rose due to the fact that Distance Ed allowed convenient access for working students and since our service district covers a large geographical area.

Data Provided

- Increase in enrollment
- Enrollment in distant education
- Increase in Hispanic student population
- Appendices B & C student characteristics

Additional Data Needed

- Service district demographics (age)

Goals for 2009-10

- Increase enrollment by 2%.
- Establish benchmarks for high school and community outreach which includes individual visits and opportunities for high school students to visit the campus.
- Report contacts in the community as they are recorded in Azorus.

Plans to help Achieve Goals

Review under-enrolled programs in fall 2009 and set enrollment targets for fall 2010 (FTE) which include program capabilities and benchmarks for each program and discipline.

A.3 An increase in student/client revenues and state-funded FTEs

Staff Rating: 21

Common Themes

BBCC is on the right path with enrollment. The college could and should have higher enrollment. Retention strategies and adequate course offerings could help the college meet enrollment goals.

BBCC should continue marketing and recruiting efforts. Update, improve and implement recruiting materials and tools which include: Azorus, new publications, and the new website. Utilize and develop partnerships to improve enrollment in all programs.

We've lost ground with students under the age of 20. College demographics do not match service district demographics.

Data Provided

- State and Total FTEs

Additional Data Needed

- Revenue collected

Goals for 2009-10

Reach excess enrollment

Plans to help Achieve Goals

Develop Annual Schedules

B.1 Students completed courses or workshops with a grade of passing or 2.0 GPA or better

Staff Rating: 16.6

Common Themes

Overall, student success rates were consistent from year to year. For an open door school, the rates seemed good. BBCC needs to continue efforts to help students succeed.

The biggest area for concern is in developmental math. Students continue to arrive at Big Bend with low levels of math preparation. Despite efforts with supplemental instruction in developmental math, the success rates were at 50% in 2008-09.

Data Provided

- Course success rates
- Success in developmental English & math
- Appendices D, E, F, & G

Additional Data Needed

- IBEST to non-IBEST success rates comparison

Goals for 2009-10

- Improve pre-college math and developmental English success rates.
- Use the average success rate of 79% (average over the last four years) as the benchmark, the goal is to have an 85% success rate in 2009-10.

Plans to help Achieve Goals

- Educate MAP (Applied Math for Professional-Technical Programs) students and instructors on the availability of tutor.com.
- Pilot a “block schedule” in winter 2010. A student will take a developmental math class, supplemental instruction, and College Success Skills class in consecutive periods.
- Facilitate the discussion with Achieving the Dream leads, deans, and instructors to discuss data and changes to improve success rates.
- Expand IBEST offerings.
- Use the IBEST model for related instruction in Professional-Technical Programs.

B.2 Students establish educational plans

Staff Rating: 10

Common Themes

Staff rated this as a 10 due to the fact that only 28% of students were estimated to have educational plans (Programs 2009 Monitoring Report). The 28% estimate was based on the number of students in Professional-Technical Programs and students participating in “high touch” programs, such as Student Support Services, Opportunity Grant, etc.

The biggest obstacle for staff evaluating this outcome was the lack of clarity on the definition of an educational plan. After discussion, we found that the essence of what we were trying to get at was the combination of activities students undertake when they select their area of study, classes and transfer college. This relates to the frequency and quality of advising.

Data Provided

- 28% have educational plans

Additional Data Needed

- Develop an outcome for ABE/ESL students
- Show number of undecided students
- Determine the number of students obtaining advising

Goals for 2009-10

- Launch a computerized degree audit system by the end of the 2009-10 academic year, that is available to all students regardless of location. This assumes that the use of the degree audit system will demonstrate some type of advising and educational plan.
- Set benchmark for Academic and Professional-Technical students based on degree audit system data

Plans to help Achieve Goals

- Educate advisors on the impact of intrusive advising on student success
- Create a process that requires and monitors frequency of contact between advisors and students – on goal setting and course planning
- Provide on-going training to advisors on degree audit
- Implement an annual class schedule to help students plan for an entire year not just one quarter

B.3 Students continue to complete goals according to their educational plan

Possible revision

B.3 Students persist to attain completions, certificates or degrees or workshops and are retained quarter to quarter and year to year to achieve their goals.

Staff Rating: 15

Common Themes

Staff varied greatly in how well they thought BBCC accomplished this goal. (10 to 20)

The retention rates seemed stable, with the exception of males and especially white males. Perhaps lower retention in males was due to high employment rates prior to 2009. Older students were not being retained at the same rate as younger students.

Appropriate placement in developmental classes is essential with less than 70% continuing from year to year.

Even with enrollment climbing in Basic Skills, the data showed percentage increases in almost all areas.

Ed Plans have the potential to make a big difference in degree attainment. It's another point of connection to the student. Degrees were down in both academics and Professional-Technical Programs. Females and Latinos are slowly on the rise but white males were not reached.

Data Provided

- Year to Year Retention appendix H
- Qtr to Qtr Retention appendix I
- Year to Year Retention developmental math or English retention Appendix J
- Qtr to Qtr Dev math or English Retention Appendix K
- Completions Appendix L

Additional Data Needed

- Student Achievement Points
- Retention comparison data
- Follow unemployment data to determine if it correlates to student success
- Transfer rates
- IPEDS graduation Rates

Goals for 2009-10

Maintain current success rates, graduation rates, and retention rates.

Plans to help Achieve Goals

Collect and analyze additional data.

Appendix C

New Student Orientation and Reenrollment

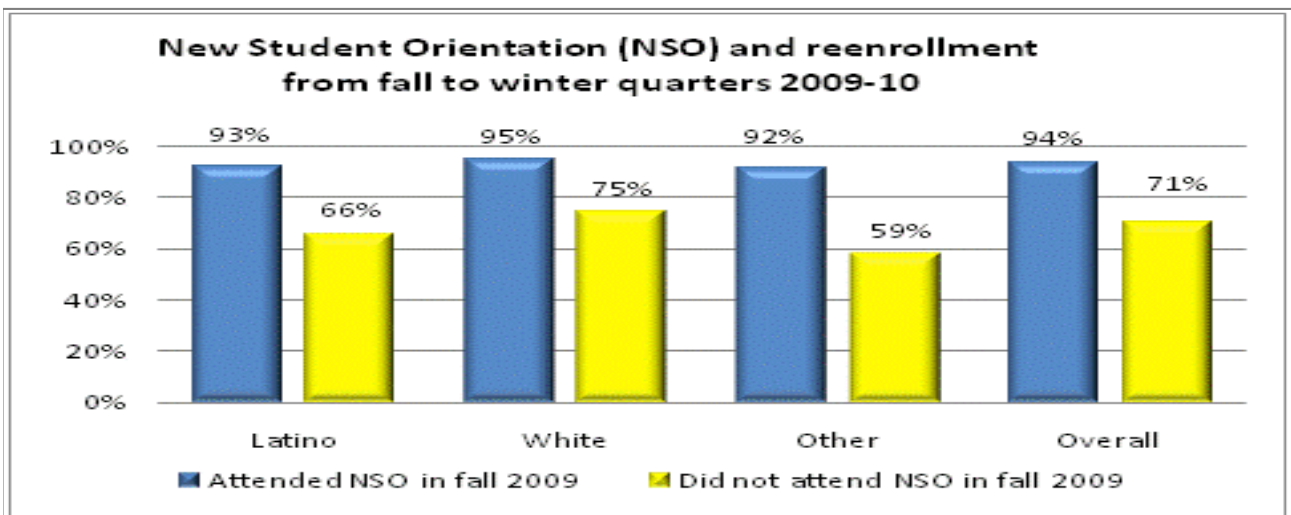

**New Students* who attended
New Student Orientation in fall 2009**

		Fall 2009	Reenrolled in Winter 2010	%
Latino Students	Female	59	55	93%

Appendix J

Students with Educational Plans

2009-10 ESTIMATED* NUMBER OF STUDENTS WITH EDUCATIONAL PLANS AT BBCC

	Number with Educational Plans	Total Enrollment	% of Total Enrollment with Educational Plans
Professional-Technical^a	1093	1093	100%
Academic/Transfer^b	992	1810	55%
Grand Total (combined Professional-Technical & Academic/Transfer)	2085	2903	72%

*Estimated numbers for spring quarter included in this table

^aFor this, we consider that 100% of Prof-Tech students are being advised. (Intent F & G, both 1st and 2nd year students)

^bFor this, we consider that all students w/ <30 credits are being advised. (Intent A & B, CUM_CREDITS_EARNED <31) and have added an additional 100 students to represent the number being advised by instructors.

Appendix M
Year-to-Year Retention

Year-to-Year Retention

- Year-to-year retention of both females and males increased from 2007-08 (reenrolled in 2008-09) to 2008-09 (reenrolled in 2009-10).
- Although year-to-year retention of males has increased nearly 10% from last year, male retention is still significantly lower than female retention (see chart below).

- Overall Hispanic year-to-year retention aligns with the overall retention rate for the past three years. Major differences arise in the Hispanic student population retention rate when it is broken down by sex.
- Hispanic female year-to-year retention increased 10% from 2007 (reenrolled in 2008) to 2008 (reenrolled in 2008); however, Hispanic male year-to-year retention decreased 10% in that same time period. This more than doubled the difference between these two groups (see chart below).

- There is more than a 10% difference between the Hispanic female year-to-year retention rate (88%) and the white female retention rate (76%). This trend is reversed and more exaggerated when Hispanic male retention (52%) is compared to white male retention (70%; see charts below).

Year-to-Year Retention*: Females by Ethnicity

*Academic and Professional-Technical students who began in a given year (any quarter) and enrolled in the subsequent year (any quarter)

Year-to-Year Retention*: Males by Ethnicity

*Academic and Professional-Technical students who began in a given year (any quarter) and enrolled in the subsequent year (any quarter)

Appendix N
Quarter-to-Quarter Retention

Quarter-to-Quarter Retention

- Overall fall-to-spring retention of new students (in fall quarter) is 91%. This is the highest rate of fall-to-spring retention seen over the past three years at BBCC.
- Although the overall fall-to-spring retention rate has increased, fall-to-spring retention of Hispanic students has decreased slightly over this time period, while fall-to-spring retention of white students increased. Because of this, there is now a 10% gap between Hispanic and white fall-to-spring retention (see chart below).

- Fall-to-spring retention of Hispanic females decreased and fall-to-spring retention of white females increased last year (see chart below left). This, in combination with the trend that Hispanic males are retained at a lower rate than their white counterparts (see chart below right), accounts for the 10% difference in fall-to-spring retention between Hispanic and white students shown in the chart above.

Appendix O
Basic Skills Achievements

BASIC SKILLS ACHIEVEMENTS

Basic skills performance is generally assessed by a number of measures:

- Percent of students who pre- and post-test using standardized assessment (indirect measure of retention since students must stay enrolled a certain amount of time to take the post-test)
- Of those who test, the percent who achieve a level gain
- Number/percent of students who achieve the goal of GED completion
- Number/percent of those students who achieve the goal of continuing to post secondary education
- Student Achievement Initiative Momentum Points gains

The following charts show Basic Skills achievements in relation to the pre- and post-test using standardized assessment:

2007-08			
CASAS TESTING			
Number Pre-Tested	Number Post- Tested	Percent Post- Tested	Percent Completed Level
1086	598	55%	64%

Number with "GED or HS Diploma" Goal	Number Completed "GED or HS Diploma" Goal	Percent Completed "GED or HS Diploma" Goal	Number with "Post- Secondary Education" Goal	Number Completed "Post- Secondary Education" Goal	Percent Completed "Post- Secondary Education" Goal
98	87	89%	196	146	74%

In 2008-09:

- The number of students who pre- and post-tested increased, but the percentage of students who completed a level decreased.
- The percentage of students who achieved their GED increased from 49% to 89%.
- The *number* of students who aspired to and achieved the goal to continue on to post-secondary education increased; however, the *percentage* of students who completed the goal decreased (96% to 74%).

Of note for upcoming years will be the momentum points achieved by Basic Skills students. In 2008-09, Basic Skills students achieved 1,916 momentum points. This represents a steady increase from previous years (2006-07 and 2007-08). Colleges receive remuneration for each momentum point achieved in the continuum from basic skills through attainment of a degree. In Basic Skills, momentum points are awarded each time a student makes a level gain in any of the subject areas of math, reading or listening (for English as a Second Language students). In 2008-09, the number of points garnered in Basic Skills represented a 23% increase from previous years. However, the focus now will be to observe the degree to which those students continue to be represented across the entire continuum of the college experience. A decrease in the numbers of students achieving momentum points in 2009-10 in Basic

Skills may be expected because of the cancellation of seven Basic Skills classes due to budget constraints. While enrollment *per class* increased to capacity and wait lists existed at some sites, the numbers of classes declined, thereby leading to an expected decrease in numbers of students served.

Data for 2009-10 will be available mid-August 2010.

Completions from 2009-10 were from SMS and run on 7/22/10

Number of Degrees Awarded by Demographics

- The gap between percent of females vs. males earning Associate Degrees narrowed in 2009-10. In 2008-09, 60% of Associate Degrees were awarded to females, whereas only 53% of 2009-10 Associate Degrees were awarded to females. Last year, approximately 40% of Associate Degrees were awarded to males, whereas nearly 50% of Associate Degrees this year were awarded to males.

Associate Degrees Awarded

	2008-09	2009-10
Female	60%	53%
Male	38%	47%

Number of Degrees* Awarded by Sex/Gender

- Overall, Hispanic student earning Associate Degrees has decreased slightly since last year. Of the degrees awarded to Hispanic students, nearly 10% fewer were awarded to Hispanic females than last year.
- Interestingly, the percent of Associate Degrees awarded to “Other” races/ethnicities of students and those whose race/ethnicity is unknown nearly doubled from last year. Because of this, the percent of Associate Degrees earned by minorities has basically remained the same from 2008-09 to 2009-10.

Appendix Q

IPEDS Comparison of Graduation Rates

IPEDS Comparison of Graduation Rates

The Integrated Postsecondary Education Data System (IPEDS) is a federal system of survey components that collects data from all institutions in the United States and other jurisdictions, such as Puerto Rico, whose primary purpose is to provide postsecondary education. Each year 6,700 postsecondary institutions provide information to the U.S. Department of Education through IPEDS. These data are used at the federal and state level for policy analysis and development; at the institutional level for benchmarking and peer analysis; and by students and parents, through College Navigator, to aid in the college search process.

The tables below show IPEDS graduation rates of BBCC full-time, first-time degree/certificate-seeking undergraduates within 150% of normal time to completion. The table on the top shows BBCC graduation rates overall, whereas the table on the bottom shows BBCC graduation rates of white and Hispanic students.

Graduation rates of full-time, first-time degree/certificate seeking undergraduates within 150% of normal time to completion (IPEDS)

*Comparison groups consist of public-serving, medium institutions in the far West. Comparison groups vary year to year.

Graduation rates of full-time, first-time degree/certificate seeking undergraduates within 150% of normal time to completion, by race/ethnicity (IPEDS)

*Comparison groups consist of public-serving, medium institutions in the far West. Comparison groups vary year to year.

Appendix U
2009 CCSSE Results Summary

How engaged are BBCC students?

CCSSE
2009

Summary of key findings from the 2009 Community College Survey of Student Engagement (CCSSE) and the 2009 Community College Faculty Survey of Student Engagement (CCFSSE) at BBCC. Key findings include results from specific survey questions related to each of the five CCSSE Benchmarks of Student Engagement.

Results Summary

What is STUDENT ENGAGEMENT and how does CCSSE measure it?

Student engagement is a valuable tool for assessing the quality of educational practices and identifying ways to help more students learn at higher levels and attain their academic goals. CCSSE focuses on institutional practices and student behaviors that promote student engagement.

Research shows that the more actively engaged students are – with college faculty and staff, with other students, and with the subject matter they study – the more likely they are to learn, to stay in college, and to reach their academic goals. CCSSE has introduced **national benchmarks of effective educational practice at community colleges**. These benchmarks focus on institutional practices and student behaviors that promote student engagement – and are positively related to student learning and persistence. A **benchmark score** is the average of scores on survey items that comprise that benchmark, weighted by full- and part-time status. CCSSE’s five benchmarks are:

- Active and collaborative learning (p. 47)
- Student effort (p. 49)
- Academic challenge (p. 51)
- Student-faculty interaction (p. 53)
- Support for learners (p. 55)

Pages 58-59 show our 2009 benchmark scores compared to our 2007 benchmark scores, as well as our scores compared to those from the “small colleges” cohort.

BCC uses its survey results to provide information about institutional performance to a variety of audiences, identify necessary improvements, and monitor progress in achieving student success goals. We also will use the survey results for benchmarking against similar institutions and institutions that offer models of excellence.

The following information focuses on CCSSE and CCFSSSE results at BCC only, unless otherwise noted.

*Interested in comparing CCSSE results to previous spring quarter survey results?
A comparison table of key survey items can be found on pages 61-62.*

What is the CCSSE National Cohort?

The 2009 CCSSE national cohort is comprised of a total of 663 institutions across 48 states, plus British Columbia, Nova Scotia, Ontario, and the Marshall Islands. Three hundred thirty-one of these colleges are classified as small (< 4,500), 162 as medium (4,500-7,999), 112 as large (8,000-14,999), and 58 as extra-large institutions (15,000 + credit students). One hundred twenty-one of the cohort colleges are classified as urban-serving, 140 as suburban-serving, and 391 as rural-serving.¹

Credit classes are randomly selected—stratified by time of day (morning, afternoon, and evening)—from institutional class data files to participate in the survey. Of those sampled in the 2009 CCSSE national cohort, 400,886 students submitted usable surveys. Students who responded to the survey generally reflect the underlying student population of the participating colleges in terms of gender, race, and ethnicity.

Number of students who participated in the 2009 survey:

- **423 students at BBCC (see p. 46 for the demographic breakdown of these students)**
- 135,911 students at other small colleges
- 400,886 students nationally

What is the 2009 Community College Faculty Survey of Student Engagement (CCFSSE)?

The CCFSSE, designed as a companion to the CCSSE, elicits information from faculty about their teaching practices, the ways they spend their professional time (both in and out of class), and their perceptions regarding students' educational experience. All faculty members who taught spring credit courses were invited (via email) to participate in the online survey. CCFSSE results enable us to view faculty expectations and perceptions of student engagement alongside student responses.

It is important to note that the comparison of faculty to student responses is not exactly equivalent. CCSSE asks students to report perceptions and experiences from the current academic year. In contrast, faculty are asked to describe their practices in a selected course, as well as to indicate their perceptions of student experiences more generally. Regardless, responses are useful for campus discussions—especially in areas where students and faculty seem to report different perceptions of the same experience.

Number of faculty who participated in the 2009 CCFSSE survey at BBCC:

- **15 faculty at BBCC (22.7% return rate; 66 faculty members were invited to participate)**
 - 12 full-time faculty
 - 3 part-time faculty

¹ These enrollment statistics are based on a college's most recent IPEDS data with the exception of situations in which it is necessary for colleges to self-report.

IS THE CCSSE SAMPLE COHORT FOR BBCC REPRESENTATIVE OF OUR ENTIRE STUDENT POPULATION?

2009 CCSSE Respondents (BBCC)

2008-09 BBCC Student Population (IPEDS)

Active and collaborative learning

It is useful to compare activities that happen in the classroom with those that happen outside the classroom when reviewing this benchmark. Given the competing demands for students' time (working, caring for dependents, commuting) colleges have limited time to engage their students.

Key findings. More students are engaged in active and collaborative learning inside the classroom than outside. For example, whereas less than one-third (27%) of students work with classmates outside of class to prepare assignments, nearly half (48%) work with other students on projects during class (Figure 1). Unfortunately, the trend for students to work on projects with classmates outside of class has been declining over the past three years (Figure 2).

It is interesting to note the difference between instructors' responses and students' responses on items related to active and collaborative learning (Table 1). Instructors feel that students are more active during class—asking questions and contributing to discussions—than students. However, more students feel they work with other students on projects during class than do instructors. Interestingly, the biggest discrepancy between instructors' and students' views is on receiving prompt feedback from instructors on students' performance.

Figure 1

Source: 2009 CCSSE data

Figure 2

Sources: 2007 CCSSE data; 2009 CCSSE data; 2008 Spring Enrollment Survey data

Table 1

<i>Students often or very often :</i>	Faculty Responses*	Student Responses
Work with other students on projects during class	40%	48%
Work with other students on projects outside of class	20%	27%
Discuss grades or assignments with instructors	60%	51%
Ask questions in class or contribute to class discussions?	93%	70%
Receive prompt feedback (written or oral) from instructors about students' performance	86%	60%

*Faculty Responses are combined full- and part-time responses

Source: 2009 CCFSSSE data; 2009 CCSSE data

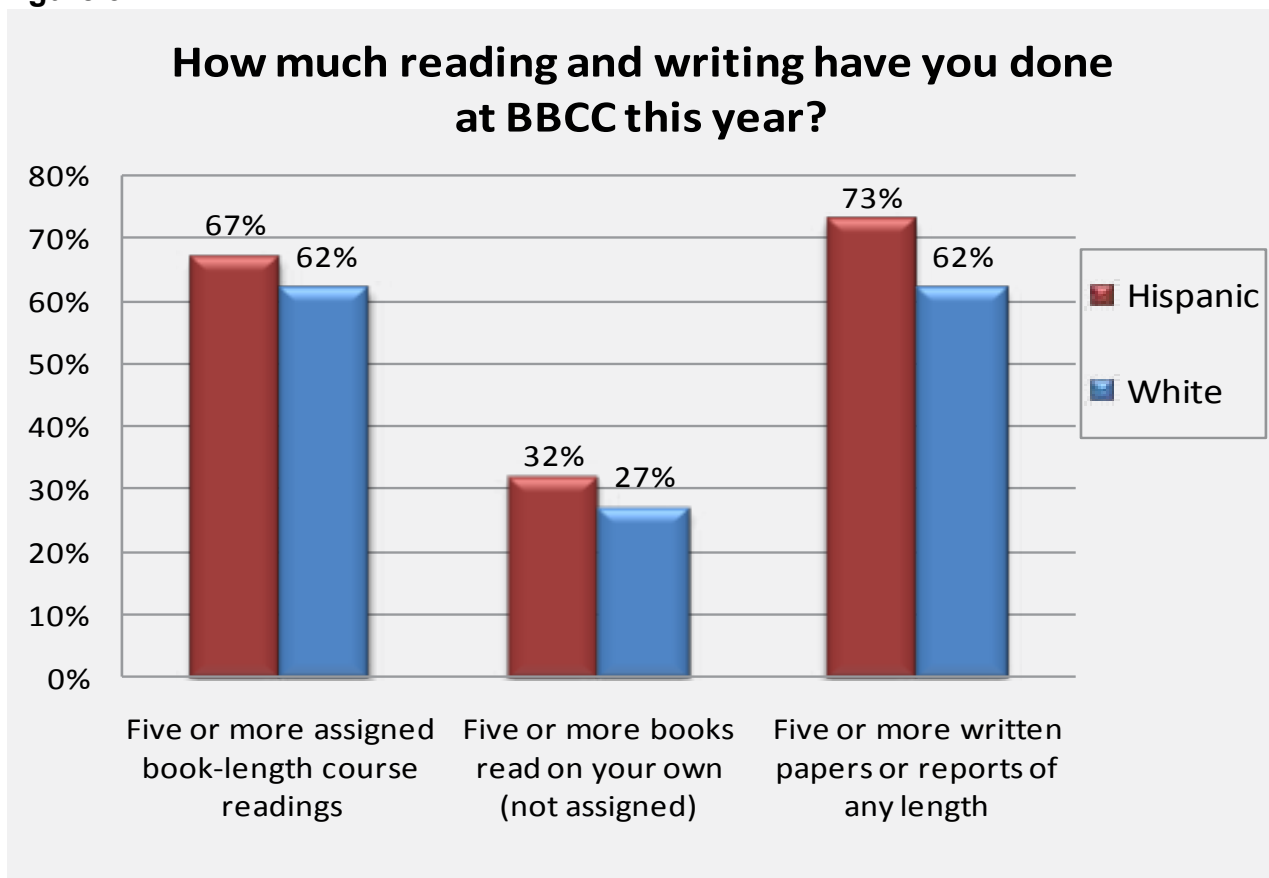

Next Steps.

Student Effort

Comparing student performance of different student groups and asking how much students *should be* studying, reading, and writing will help to better understand results on this benchmark. This will also give the college necessary information identify groups that may be underperforming when compared to others and spark discussions as to how to better or further engage these groups specifically.

Key findings. Nearly half of BBCC students (48%) prepared two or more drafts of a paper or assignment before turning it in. There was nearly a 10% difference between Hispanic and white students with just over half (54%) of Hispanics preparing two or more drafts and 44% of whites doing so. A similar difference is seen between females and males—11% more females worked more on assignments than males. Hispanic students read and write more than white students, as illustrated in Figure 3. There was no apparent difference between males and females in this respect.

Figure 3

Source: 2009 CCSSE data

Overall, one-third of students spend *five hours per week or less* preparing for class. When we look at how much time students dedicate to various activities, it is important to note that well over half of students are working for pay each week. When we break this down by the number of hours each group is working, we see that more white students than Hispanic are working 11-29 hours each week, but more Hispanic students work more than 30 hours each week. The same trend is seen in the amount of time students dedicate to preparing for class. (Table 2)

Table 2

About how many hours do you spend in a typical 7-day week:		11-29	30+
Preparing for class	Hispanic	25%	8%
	White	32%	4%
Working for pay	Hispanic	30%	27%
	White	35%	25%
Providing care for dependents living with you	Hispanic	14%	36%
	White	12%	26%
Commuting to and from classes	Hispanic	8%	5%
	White	5%	2%

Source: 2009 CCSSE data

Next Steps.

Academic Challenge

Comparing students' responses on survey items that correspond with higher-level cognition to their responses about memorizing fact and ideas is one thing to look at when analyzing performance on this benchmark.

Key findings. Students feel their coursework emphasizes rote memorization as much as or more than higher-level mental activities. Over 70% of students report that their coursework emphasizes memorizing facts or ideas *quite a bit* or *very much*. (Only 64% of students at other small colleges reported this.) The same percentage of BCC students say their coursework emphasizes analyzing the basic elements of an idea, experience, or theory. Fewer students report their coursework emphasizes synthesizing and organizing ideas, making judgments about the value or soundness of information, applying theories or concepts to practical problems, or using information to perform a new skill. (Figure 4)

Interestingly, faculty do not perceive coursework as emphasizing the same things as students do. For example, only 27% of faculty feel that coursework emphasizes memorization over other, higher-level cognitive activities (72% of students felt memorization was prominent in their studies). Additional differences between faculty and student perception of various mental activities in coursework are illustrated in Figure 4.

Figure 4

Sources: 2009 CCFSSSE data; 2009 CCSSE data

Next Steps.

Student-Faculty Interaction

It is useful to compare student and faculty responses to survey items associated with student-faculty interaction. Additionally, disaggregating the data by various student groups will reveal the different ways student groups perceive student-faculty interaction and will help lead discussion on how to improve this for groups that might have less interaction with or lower quality relationships with faculty.

Key findings. Responses to all but one survey item associated with student-faculty interaction show clear differences between part-time and full-time students. Part-time students interact less with faculty than do their full-time counterparts. For example, while half of full-time students use e-mail to communicate with an instructor, only 35% of part-time students do so. Additionally, fewer part-time students discuss grades or assignments with instructors, talk about career plans with an instructor or advisor, or work with instructors on activities other than coursework. Fewer part-time students feel they receive prompt feedback on performance from instructors than full-time students. Interestingly, when we compare **all** student responses to faculty responses on these survey items, we find that faculty generally feel that they are interacting with students more than students feel they are (Table 3).

Table 3

This year, students often or very often :	Faculty Responses*	Student Responses
Used e-mail to communicate with an instructor	67%	45%
Discussed grades or assignments with an instructor	60%	51%
Talked about career plans with an instructor or advisor	20%	33%
Discussed ideas from your classes with instructors outside of class	13%	25%
Received prompt feedback from instructors on your performance	86%	60%
Worked with instructors on activities other than coursework	13%	10%

*Faculty Responses are combined full- and part-time responses

Sources: 2009 CCFSSSE data; 2009 CCSSE data

Another indicator of student engagement and student-faculty interaction is the quality of relationships between students and faculty. Again, comparing overall student response to faculty response on this survey item can reveal the different views these groups have of their relationships. Additionally, breaking the data down by different student groups can lend insight into the gaps that exist in student-faculty relationships among different students.

Survey results indicate a difference between students' perception of the quality of their relationships with instructors versus faculty's perception of the quality of these relationships. Additionally, there is a difference between Hispanic and white students. Although still high, the quality of relationships between Hispanic students and instructors is nearly 10% lower than the quality of relationships between white students and instructors. (Figure 5)

Figure 5

Sources: 2009 CFSSE data; 2009 CCSSE data

Next Steps.

Support for Learners

Support for learners can be analyzed by reviewing students' responses on survey items related to the services they use, the importance they place on those services, and their satisfaction with them.

Key findings. The three services that most students consider very important are: financial aid advising, academic advising, and the math/English labs. (Table 4)

Financial Aid Advising: Just over half (56%) of students use financial aid advising services *often* or *sometimes*, yet nearly 70% feel it is very important to them at BBCC. The majority of those who accessed this service were satisfied with it (87%); however, only half (52%) were *very* satisfied with it.

Academic Advising: Approximately 60% of students use academic advising services *often* or *sometimes* and over 90% are satisfied with it. With proper academic advising being critical to student success, it is surprising that more students do not use the service. Interestingly, 100% of faculty believe academic advising is *very* important to students, yet 20% *rarely* or *never* refer student to the service. Additionally, 73% of BBCC faculty surveyed *rarely* or *never* incorporated academic advising into their selected course. When asked how many hours in a typical 7-day week faculty spend advising students, we find that **80% spend fewer than five hours a week** providing this service (100% of part-time faculty and 75% of full-time).

Math/English Labs: The math and English labs provide valuable assistance to students struggling with coursework and lab services are rated as very important by nearly 60% of students. This, in addition to the fact that 95% of those who use these labs are satisfied with the services, makes it surprising that only half (52%) of students take advantage of lab services. Additionally, only 53% of faculty *often* refer students to the labs and 20% *rarely* or *never* do!

Table 4

Percentage of students indicating the importance, frequency of use, and satisfaction with the following student services:	Importance (very)	Frequency of use (often/sometimes)	Satisfaction (somewhat/very)
Financial aid advising	67%	56%	87%
Academic advising	64%	61%	92%
Math/English labs	59%	52%	95%
Career counseling	50%	37%	83%
Transfer assistance	50%	29%	80%
Tutoring	47%	33%	87%
Services to students with disabilities	44%	10%	75%
Job placement	37%	18%	75%
Child care	34%	8%	64%

Source: 2009 CCSSE data

Next Steps.

Selected 2009 CCSSE Results

Number of participants at BBCC: 469 in 2007; 423 in 2009

CCSSE's Five Benchmarks:

- Active and collaborative learning
- Student effort
- Academic challenge
- Student-faculty interaction
- Support for learners

Benchmark score: average of scores on survey items that comprise that benchmark, weighted by full- and part-time status

The weighted mean across ALL students (national cohort; over 650 colleges) is 50 and the standard deviation is 25. This is indicated on the following charts by a dashed line.

Small colleges: <4,500 credit students (260 small colleges in 2007; 331 small colleges in 2009)

Active and Collaborative Learning

Students learn more when they are actively involved in their education and have opportunities to think about and apply what they are learning in different settings. Through collaborating with others to solve problems or master challenging content, students develop valuable skills that prepare them to deal with the kinds of situations and problems they will encounter in the workplace, community, and their personal lives.

Student Effort

Students' own behaviors contribute significantly to their learning and the likelihood that they will successfully attain their educational goals.

Academic Challenge

Challenging intellectual and creative work is central to student learning and collegiate quality. Ten survey items address the nature and amount of assigned academic work, the complexity of cognitive tasks presented to students, and the standards faculty members use to evaluate student performance.

Student-Faculty Interaction

In general, the more contact students have with their teachers, the more likely they are to learn effectively and persist toward achievement of their educational goals. Through such interactions, faculty members become role models, mentors, and guides for continuous, lifelong learning.

Support for Learners

Students perform better and are more satisfied at colleges that are committed to their success and cultivate positive working and social relationships among different groups on campus.

Student and Academic Support Services

	Importance ¹		Use ²		Satisfaction ³
