

# Instructions for Online Math Placement Testing (WAMAP)

## Before the Test

- 1) Complete the online Viking Orientation (If you are a new student)
- 2) Create your BBCC email account (Email activated after 24 hours. Longer on weekends)
- 3) You will need a laptop with a webcam

If you would like to review math videos before you test, click here [Math Study Videos](#)

## Test Day

- 1) Use the following link to access the online math placement test <https://bigbend.instructure.com/enroll/7MMAEW> (you will need to type in your email and password)
- 2) View Dr. Wallace's video for instructions on security functions and how to take the tests
- 3) Download Honorlock (a password will be provided to you)
- 4) Select the test you want to take first. It is recommended that you start with MATH 094 – Beginning Algebra (select *To place into MATH 094*). After you have completed this test, if you scored high enough, you can move to the next test until you feel you have an accurate placement. When you begin a new test, you will have to complete the security measures. The more tests you are able to complete gives the best picture of what math placement is a right fit for you. If you take the first and/or second test and want to stop and use that information for your placement, you can as the other tests are more advanced.

When you have finished testing, please notify Kristin Young, Testing Center and Tutoring Coordinator, at [kristiny@bigbend.edu](mailto:kristiny@bigbend.edu). Kristin will evaluate your testing video and reply to your email informing you of your math placement.
